Innerspring mattresses are available in 3 different firmnesses. The different firmnesses are achieved:

- **Soft**: 13-19 ILD
- **Medium**: 32-37 ILD
- **Firm**: 50-60 ILD

Each coil is 6.25" tall with 5 turns per coil which provides for maximum support and comfort.

Each Flex-a-Bed innerspring unit is innerbonded, meaning all mattress components are fastened to the innerspring unit. Innerbonding insures durability and superb tailoring throughout the life of the mattress.

Every Flex-a-Bed mattress's bottom layer is protected by a non-skid material that prevents the mattress from sliding across the adjustable foundation. This material also provides a flame-resistant barrier.

Every Flex-a-Bed mattress is made with soft, high-quality circular knit fabric complete with a suede border to create an elegant look.

Flex-a-Bed never splices the border or the tape edge of our mattresses.
Innerspring mattresses are available in 3 different firmnesses. The different firmnesses are achieved through the ILD (Indent Load Deflection) of the foam.

<table>
<thead>
<tr>
<th>Firmness</th>
<th>ILD Range</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soft</td>
<td>13-19 ILD</td>
<td>Requires 13-19 lbs of weight per square foot to compress 25% of loft</td>
</tr>
<tr>
<td>Medium</td>
<td>32-37 ILD</td>
<td>Requires 32-37 lbs of weight per square foot to compress 25% of loft</td>
</tr>
<tr>
<td>Firm</td>
<td>50-60 ILD</td>
<td>Requires 50-60 lbs of weight per square foot to compress 25% of loft</td>
</tr>
</tbody>
</table>

Each Flex-a-Bed innerspring unit is a 336-coil, 13 gauge Bonnell spring unit.

Each Flex-a-Bed mattress is made with soft, high-quality circular knit fabric complete with suede border to create an elegant look.

Flex-a-Bed never splices the border or the tape edge of our mattresses.
**VISCO COMBO MATTRESS**

<table>
<thead>

**QUILT TOP**
- All Flex-a-Bed mattresses come with a plush, multi-layered, quilted cushion-top which is made with hi-density super-soft polyurethane foam and flame resistant polyester fiber.

**VISCO MEMORY FOAM LAYER**
- 1.25" Visco memory foam comfort layer
- 10 ILD (Indent Load Deflection) - requires 12 lbs of weight per square foot to compress 25% of loft
- 4 lb density

**INNERSPRING UNIT**
- Each Flex-a-Bed combo unit is a 336-coil, 13 guage Bonnell spring unit
- Each coil is 6.25" tall with 5 turns per coil which provides for maximum support and comfort
- Each Flex-a-Bed combo unit is innerbonded, meaning all mattress components are fastened to the innerspring unit. Innerbonding insures durability and superb tailoring throughout the life of the mattress.

**NON-SKID FLAME BARRIER**
- Every Flex-a-Bed mattress's bottom layer is protected by a non-skid material that prevents the mattress from sliding across the adjustable foundation. This material also provides a flame-resistant barrier.
- Every Flex-a-Bed mattress is made with soft, high-quality circular knit fabric complete with suede border to create an elegant look
- Flex-a-Bed never splices the border or the tape edge of our mattresses
## VISCO CORE MATTRESS

</tbody>
</table>

### QUILT TOP
- All Flex-a-Bed mattresses come with a plush, multi-layered, quilted cushion-top which is made with hi-density super-soft polyurethane foam and flame resistant polyester fiber.

### VISCO MEMORY FOAM CORE
- 2" Visco memory foam core
- 10 ILD (Indent Load Deflection) - requires 12 lbs of weight per square foot to compress 25% of loft
- 4 lb density

### POLYURETHANE FOAM CORE
- 6.75" polyurethane foam core
- 32 ILD (Indent Load Deflection) requires 32 lbs of weight per square foot to compress 25% of loft
- 1.8 lb density - weighs 1.8 lbs per cubic foot
- The Visco core is laminated to the polyurethane foam to create a solid core

### NON-SKID FLAME BARRIER
- Every Flex-a-Bed mattress's bottom layer is protected by a non-skid material that prevents the mattress from sliding across the adjustable foundation. This material also provides a flame-resistant barrier.
- Every Flex-a-Bed mattress is made with soft, high-quality circular knit fabric complete with suede border to create an elegant look
- Flex-a-Bed never splices the border or the tape edge of our mattresses
Latex is a naturally derived biodegradable product & more resilient. Belgium processed produces a more even latex cell structure. Bacteria, mildew & mold cannot live in latex. Every Flex-a-Bed mattress is made with soft, high-quality circular knit fabric complete with suede border to create an elegant look. Flex-a-Bed never splices the border or the tape edge of our mattresses. Latex is hypo-allergenic & breathes to keep you warm in the winter and cool in the summer. Latex is a naturally derived biodegradable product & more resilient. Belgium processed produces a more even latex cell structure. Bacteria, mildew & mold cannot live in latex.
